Your Comments:

I think Alternative I is too weak to cleanup the river. I urge you to chose Alternative G, with some additional considerations - such as lifting the Fish Consumption Advisory at the end of the cleanup.

Please make the plan stronger and chose option G. My family has lived near the Willamette for 4 generations, and we have fished there for a long time.

People do not need to have their cancer risk raised by leaving contamination in the river. Further, there are myriad wildlife that are affected by the pollutants in the Willamette. These species get too little consideration.

Option G is reasonable, and should be selected by your agency.

Thanks.
